

## Adventa Bioscience™ Launches Trulacta

Attwill is pleased to announce the launch of Trulacta® the first product from our Accelerator portfolio company, Adventa Bioscience Inc. Adventa Bioscience is an innovative company dedicated to improving adult human health today announced the launch of Trulacta, the world's first and only supplement made entirely of human milk. Adventa has utilized advanced science and proprietary technology to create a supplement containing human milk to deliver the beneficial effects of Human Milk Bionutrients™ (HMBs), which have been shown to support whole-body health. Trulacta is the first supplement made from human milk, the milk is sourced from excess milk at milk banks in the United States that is not sold to hospitals the milk is then lyophilized and encapsulated at Attwill's Lodi Wisconsin plant.

Trulacta is composed entirely of thousands of beneficial components found in human milk, all of which are essential for health and wellbeing. The supplement's HMB's include Human Milk Oligosaccharides (HMO), Growth Factors, Immunoglobulins, Macrophages and Stem Cells, as well as other enzymes and peptides critical to optimizing whole-body health. Together these rich compounds have shown to support the development of the immune system, protect from autoimmune disease, actively fight bacteria and allow the body to maintain and restore itself.

Trulacta launched its website on January 26, 2021 as a soft launch for family, friends, and investors of AMS. Trulacta intends to have a hard launch to the general public in February of 2021 and launch on Amazon in the spring of 2021.
